## Professional Summary

ITIL 4 certified IT professional supporting Nova Scotia Health's enterprise Oracle Health implementation. Experienced in analyzing user and workflow issues, documenting incidents and process gaps, coordinating escalations across technical teams, and guiding users through operational change. Brings formal education in cybersecurity and application development, strong written communication, and a practical focus on reliable service delivery and continual improvement.

## Core Qualifications

**IT Service Management:** ITIL 4, incident triage, escalation coordination, service requests, change support

**Analysis and Documentation:** workflow analysis, requirements clarification, issue trend identification, process documentation, user guides, reporting

**Tools:** Microsoft Word, Excel, PowerPoint, Teams, Assyst, FreshWorks, Oracle Health EHR

**Technical:** Windows, macOS, Linux, Active Directory, PowerShell, SQL, JavaScript

## Work Experience

**Nova Scotia Health Authority** **August 2025 – Present**
*ATE Support Consultant* *Halifax*

- Analyzed and resolved user issues within OPOR clinical workflows, identifying system or process gaps and escalating technical defects to appropriate support teams.
- Document, track, and coordinate incidents in Assyst, working across analysts, identity teams, and specialized support groups while maintaining clear communication with clinical users.
- Support major go-live activities by helping staff adapt to new Oracle Health workflows, clarifying requirements, and identifying recurring process or system gaps.
- Create clear ticket documentation and practical guidance that supports troubleshooting, knowledge transfer, privacy requirements, and reliable service delivery.

**Resolve Sleep Health** **May 2024 – August 2024**
*Information Technology Intern* *Bedford*

- Created technical documentation, user guides, and spreadsheets using Microsoft Office to support employee workflows.
- Developed Excel trackers, user guides, and onboarding resources to improve visibility, standardize technical processes, and help employees adopt internal systems.

**Concentrix** **May 2022 – July 2023**
*Technical Customer Service Representative* *Dartmouth*

- Provided Tier 1 support for iOS and macOS users by interviewing customers, analyzing hardware, software, connectivity, and account issues, and recommending next steps.
- Maintained a 90 percent customer satisfaction score while coordinating a high volume of technical support requests and repair appointments.

## Certifications

**ITIL v4 Foundation Certification** – PeopleCert (2025)

## Education

**Nova Scotia Community College** **September 2023 – June 2024**
*Graduate Certificate — Full Stack Application Development* *Halifax*

**Nova Scotia Community College** **September 2018 – June 2020**
*College Diploma — Cybersecurity* *Halifax*
